

ABA art contemporani presents,

Ramón Company NEXUS

Opening: 21st of October, 8:00p.m.

Exhibition: 21st of October 2005 - 3rd of December 2005

“Our surrounding defines us. The landscape which appears every day in our eyes gives back to us, and enriches us with the energy that makes it possible to be present in the world.”

Ramón Company, until now our most international artist, achieves another highlight with his individual exhibition “Nexus.” During the year 2005, he presented his work at two international exhibitions: *Art Basel Miami Beach*, and *KIAF* (Korea.) His work was well received, and as a result, many form parts of private collections. Today we present another stepping-stone in his artistic career, his 11th individual exhibition. We observe geometrical figures, in the warm color range of red, orange and brown, in a new, picturesque manner.

In his exhibition “Nexus,” Ramón Company lets us dive into (*his*) memories and intuitions. Reveal, discuss, confirm and contradict. Looking at his work, each can associate something different; Company’s work allows many different points of view.

The human being, is one aspect he focuses on – persons in their calm and friendly manner, concentrated into groups; although each to his own an individual, together, they form one.

Ramón Company has participated in various international solo–, and collective exhibitions within the United States, Asia and Europe (Germany, Belgium, France, Spain), confirming his excellent work and remarkable professional career.

Company’s work is represented in public collections including the museum for “Bellas Artes de Amberes” in Belgium, the “*Testimoni*” collection of *la Caixa* (Barcelona), and the in the National Library of Madrid.
